and  
Silent Auction**

---

### **President's Message**

*Happy New Year to you and yours!*

Just be glad we live in Arizona and not the Midwest or East ..... I grew up in that snow and do NOT miss it. Our thoughts & prayers are with all the millions that were and are still impacted.

The Sunshine Regional is fast approaching, so please consider chipping in a few hours to help us with the various tasks that bring this thing together successfully each year! We will discuss the needs at the January meeting.

Please..... PLEASE..... consider becoming part of our meetings with a simple presentation on your field(s) of expertise. It does not need to be fancy. Just contemplate what you could share with the group. We need to plan the educational presentations for the next few months, so give it some serious thought!

This month's presentation will be on **Accutron Watches** and their history, presented by the "3 Amigos" (Paul Arutt, Rodolfo Carballo, and Henry Gostony). It should be a most entertaining presentation for all.

Bring your "stuff" for the silent auction and show-n-tell time, where you can "brag" about one or two of your prized goodies! And don't forget the lunch we have at Phil's Filling Station after our monthly meetings! Good food and good times abound.

See you all at 9:00 AM on January 14<sup>th</sup>, with a silent auction, business meeting, the show-&-tell, educational presentation, and lots of good conversation.

Jim Powell  
President, Chapter 112

---

### **Educational Presentation**

**The Bulova Accutron Watch  
from its Beginning to the Present Day**

**by Paul Arutt, Rodolfo Carballo and Henry Gostony**

Paul, Rodolpho, and Henry will talk about the history of this innovative watch brand from its inception to the most recent electrostatic model. They will display original sales and service materials, give a light technical overview of the tuning fork models and discuss collecting Accutrons - what to look for and what to avoid. Sixty years following its introduction, Bulova has developed a new electrostatic movement reflecting the original theme. A short video will provide an overview of this new and expensive Accutron, the Accutron Spaceview 2020, shown in the photo below.
