

The Journal of the Electrical Horology Society

Chapter #78 National Association of Watch and Clock Collectors

President's Message

Fellow Horologists:

As the holiday season approaches, best wishes for happy holidays and for a prosperous and healthy New Year. Please don't forget that Chapter #78 membership dues are due on the date shown on the upper right hand corner of the address label on your copy of the Journal. Please check the date on the address label and send in your dues to our treasurer promptly as this reduces the chapter operating costs. Keeping costs to a minimum allows us to maintain the low cost of our yearly dues.

For your travel planning purposes, the Dayton, Ohio 2013 NAWCC National Convention is kindly providing time and space for a meeting of Chapter #78 members and all those interested in electrical horology. It is too early to list the actual time for the meeting but the meeting will be held on Friday, July 5, 2013. We will have additional information in the next issue of the Journal but for the time being, please plan on attending the electrical chapter meeting. Since the Mart also opens on Friday morning, come early to the National Convention and enjoy the Mart and the opportunity to meet with fellow enthusiasts.

This reprint included a brief Herschede history written by Chris Bailey. Thus, permission was needed from both the Southern Ohio Regional and the American Watch and Clock Museum. Then it was pointed out that the R&M Imports now owns the Herschede Company and permission was also needed from R&M Imports. R&M granted us their permission and we were ready to go to press. Thank you to all who kindly gave us permission to reprint this very significant catalog.

Also included in this issue of the Journal is a copy of the 1958 Dealer Price List for General Electric Telechron electric clocks. This listing is particularly interesting since the retail and wholesale prices are given. There are many ways to determine the rate of inflation for the prices for the clocks shown but multiplying the prices in the price list by 7 provides a pretty good estimate for the clock prices in 2012 dollars.

Enjoy this issue of the Journal of the Electrical Society.

Bill Ellison, FNAWCC President

The Side Bar:

- In this issue, Part I of Herschede Electrically Wound Floor Clocks and Mantel Clocks.
- Also featured is a 1959 Telechron Dealers price list.
- Members: "We are always looking for information suitable for the Journal and greatly appreciate the loan of original material."

Inside this issue:

President's Message	1	The featured article for this issue of the Journal is Part 1 of the "Herschede Hall Clock Company" catalog for their electrically wound clocks. Part 2 of the catalog will be included in the next issue of the Journal.
Herschede Electrically Wound Floor Clocks and Mantel Clocks—Part I	2	The clocks described in this catalog are beautiful clocks that are still very desirable. The permission to reprint this catalog represents a minor saga.. The catalog that is reproduced in this issue of the Journal was copied from a reprint of the original catalog and was published as a gift for attendees at a Southern Ohio Regional. The Southern Ohio Regional reprint was copied from an original catalog taken from the collections of the American Clock and Watch Museum.

ELECTRIC TIME AND CATHEDRAL CHIME

Note: Special thanks to the American Clock and Watch Museum, Southern Ohio Regional, and R&M Imports for their kind permission to republish this catalog for the members of Chapter #78, NAWCC.

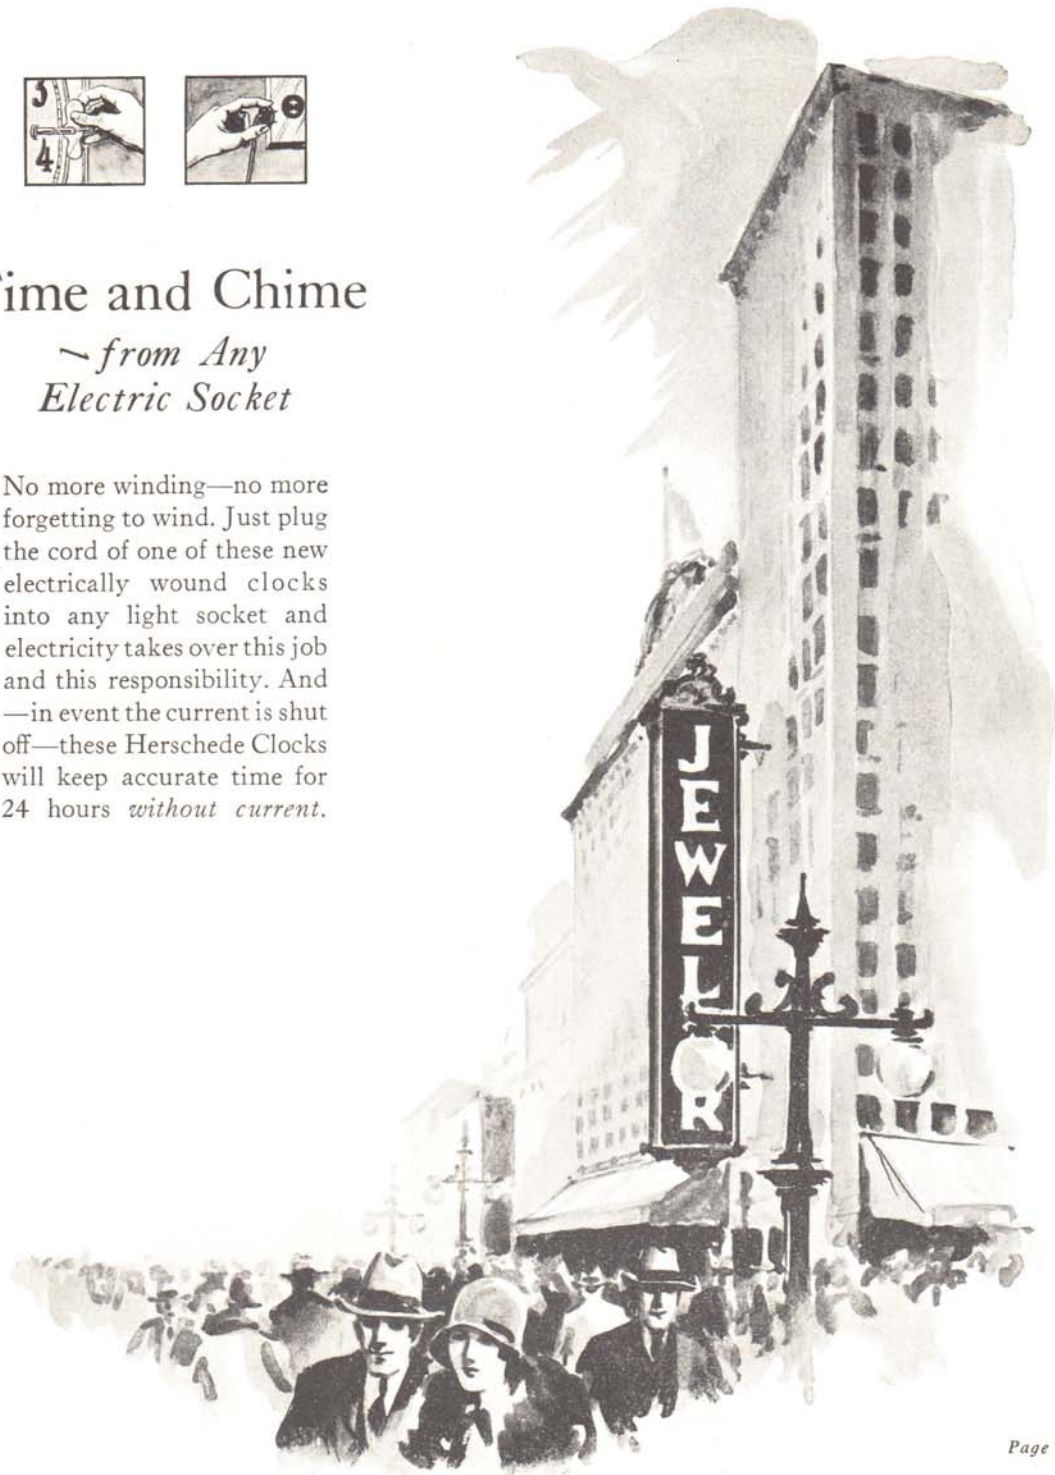

Herschede Electrically Wound Floor Clocks & Mantel Clocks - Part I (continued)

Time and Chime

—from *Any Electric Socket*

No more winding—no more forgetting to wind. Just plug the cord of one of these new electrically wound clocks into any light socket and electricity takes over this job and this responsibility. And—in event the current is shut off—these Herschede Clocks will keep accurate time for 24 hours *without current*.

Herschede Cases *Are Truly Works of Art*

FROM its inception in the mind of the designer to the final touch of the finisher, every case in which Herschede Electrically Wound Chime movements are installed reflects, in every detail, the true touch of the artist. Whether it is a conventional or a period design, it is correct in every line and detail. Herschede designers are artists of national reputation. They are given free rein to express their individuality.

The markets of the world are searched for fine woods and veneers that will prove fitting mediums for their artistry. Fine mahogany from Honduras, rich Satinwood from the East Indies, Rosewood, French butt Walnut, Amboyna burl, Redwood burl, Maple burl and other choice veneers with the beautiful "cloud" grains lend their rich beauty to Herschede cases.

The designer does not stop with his drawings—but carefully supervises the making of each model case. And, finally, the work of cutting, carving and fashioning these masterpieces is entrusted only to the most skillful of cabinet makers—craftsmen who are satisfied with nothing short of the highest standards of workmanship.

Herschede Electrically Wound Floor Clocks & Mantel Clocks - Part I (continued)

Electrically Wound Tubular Chiming Movements

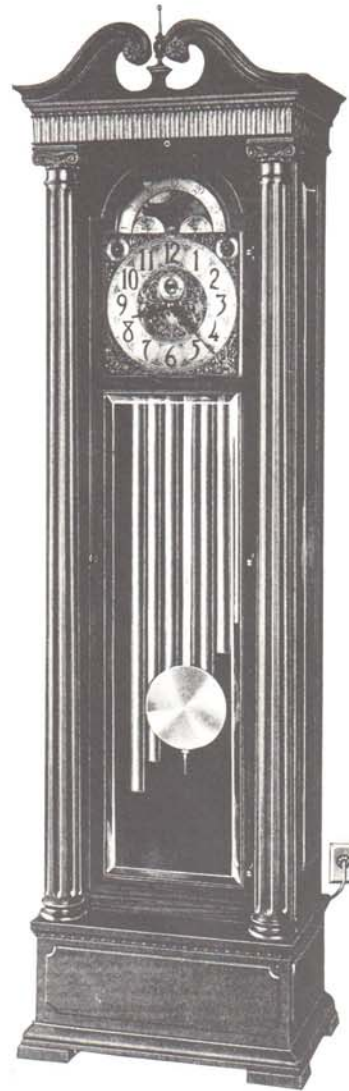

ANY OF THESE Herschede electrically Wound Chiming Floor Clocks may be had in a choice of three chime movements: Westminster; Westminster and Canterbury; or Westminster, Canterbury and Whittington—on five, seven or nine true tone Tubular Bells, respectively. The chime train, as well as the hour train, operates direct from the motor. The chimes are fully self-adjusting, and may be changed or silenced.

Herschede Electrically Wound Chiming Floor Clocks operate on 110 volt 60 cycle alternating current. Motors of other than 60 cycles can be furnished on request.

Every Herschede Clock carries our guarantee of perfection.

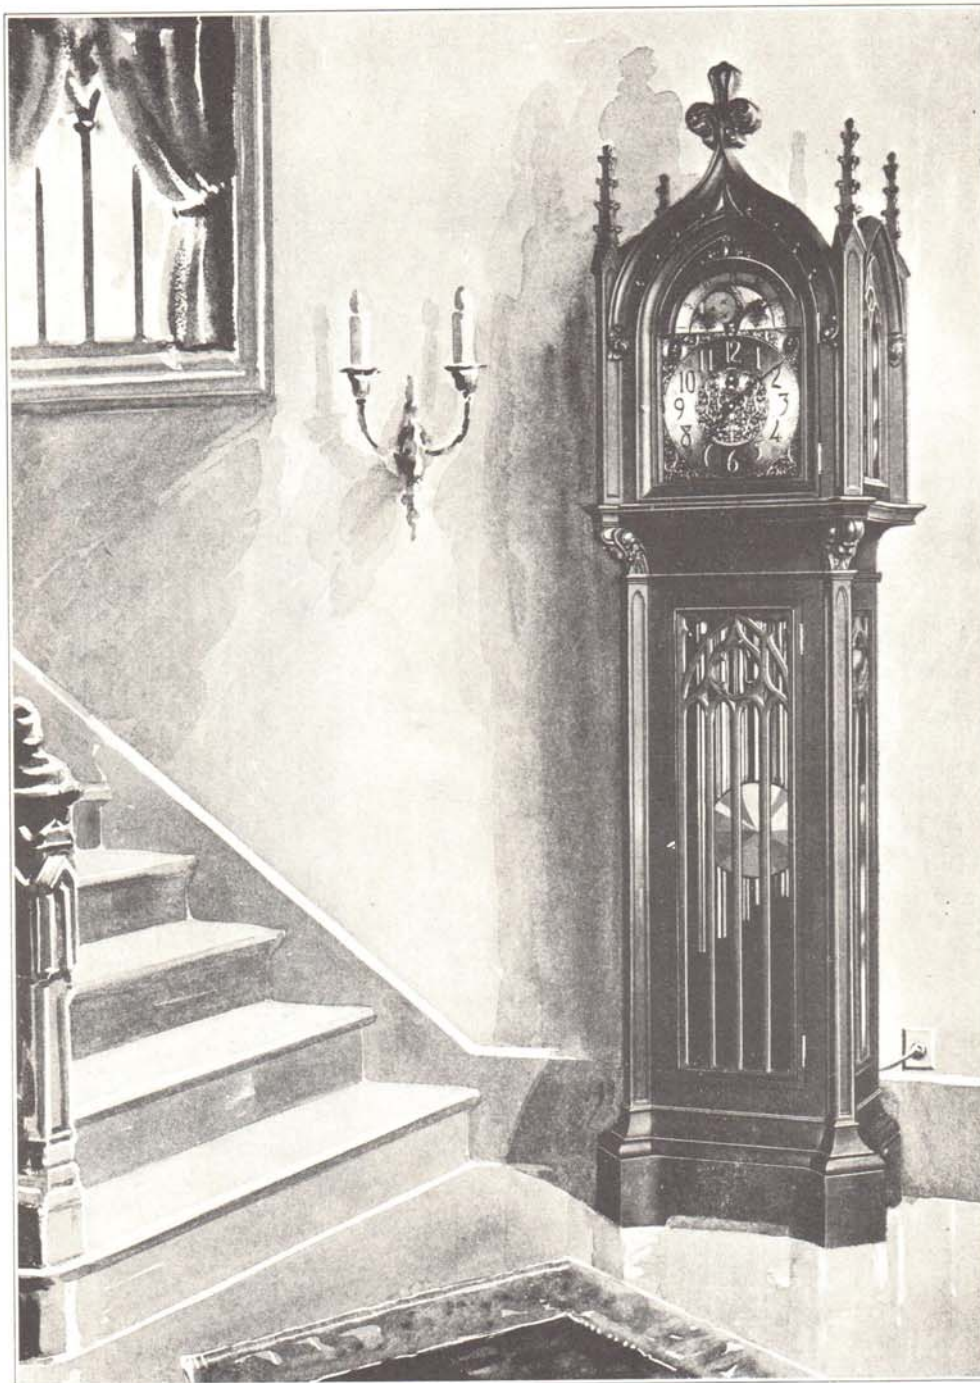

The clocks are illustrated without weights, as they are not necessary for the operation of the movement. However, if the customer prefers, these ornamental weights can be furnished, at slight extra cost.

All American Product

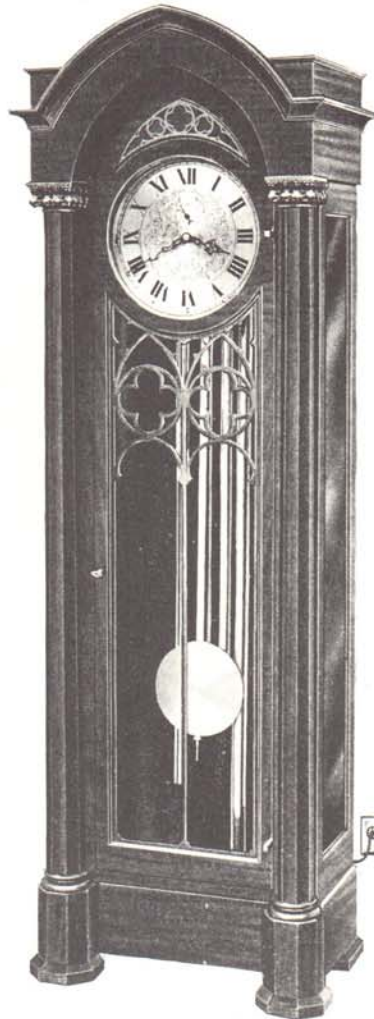

in both Cases and Movements

HERSCHEDE Electrically Wound Chiming Floor Clocks are All-American products. Both cases and movements are made, completely, in the Herschede plant at Cincinnati. Herschede is not only the oldest and largest maker of Chiming Floor Clocks in America, but the *only* manufacturer in the country making complete movements and cases.

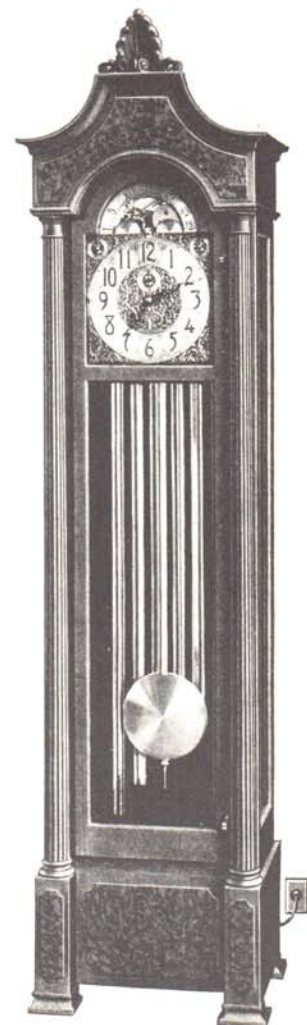

Herschede Clocks are, first of all, dependable timekeepers. The movements are built to a degree of fineness and accuracy unsurpassed by any clock maker in the world. They are built to keep accurate time not merely for a few years, but for generations.

Clocks shown on this page may be had with either one, two or three chime movements—Westminster, Westminster and Canterbury, or Westminster, Canterbury and Whittington—chiming on five, seven or nine true tone tubular bells respectively. The chimes are fully self-adjusting and may be changed or silenced.

The cases are of finest Honduras mahogany, medium brown finish, hand rubbed.

Distinctive Petite Models Herschede Electrically Wound Chiming Floor Clocks

"I'D LOVE TO HAVE IT—but our home is too small—where in the world would we put it?" That's the question that has stopped many a sale of the larger floor clocks. The many modern small homes and apartments, with their small rooms and low ceilings, have created a growing demand for smaller floor clocks. Herschede has met this demand with a line of Petite Electrically Wound Chiming Floor Clocks, designed especially for the small home and apartment.

These Petite Model Electrically Wound Clocks are built throughout with the same care and accuracy as the larger Herschede Floor Clocks. The same beauty of design and of finish—the same quality materials—the same accuracy and fineness of adjustment that have made Herschede the largest selling line of chiming floor clocks on the market.

They are fitted with the same tubular Chime Movement and may be had with one, two or three chimes; Westminster, Westminster and Canterbury, or Westminster, Canterbury and Whittington, chiming on five, seven or nine true-tone tubular bells, respectively.

Telechron Electric Clocks—1959 Dealer Price List

GENERAL  ELECTRIC
Telechron
ELECTRIC CLOCKS

DEALER PRICE LIST

Effective July 1, 1959

No. 113

FULL LINE

Refer to Full Line Catalogue for complete details in U.S.A. only

Prices—The amount of any present or future sales, use, revenue, excise or other tax which may be applicable to the clocks covered by this price list, or to the manufacture, sale or use thereof, shall be paid by the purchaser.

Voltage and Frequency—AC current only. 110-125 volts, 60 cycles is standard. Most clocks are obtainable on other than standard voltage and frequency, at a small additional charge.

This price list supersedes and cancels all previous General Electric-Telechron Electric Clock price lists and is subject to change without notice. It is distributed by the Clock and Timer Dept., Housewares and Radio Receiver Division, General Electric Company, Ashland, Mass., through authorized distributors.

Calling all Members:

If you have a link to an interesting internet site you think other members may enjoy visiting, let us know and we build a list in the Journal. Of course it should be about electric clocks or watches. Sites with information about repair and restoration tips and techniques are also encouraged.

Electronic "master clock" for old slave dials: \$50. "Governor" makes Eureka clocks keep quartz-accurate time with no change to the clock: \$95. Voltage regulators: \$35 to \$55. Bryan Mumford, 3933 Antone Road, Santa Barbara, CA 93110; (805) 687-5116; E-Mail www.bmumford.com.

BANGOR Electric Clock Parts, New Factory original parts ... too many to list separately. Call or e-mail with your needs. Elmer Crum; (727) 868-0181; E-mail at electrichorology@juno.com.

Tower & Street Clocks - Electric Time Company, manufacturers new tower and street clocks. Exact replacement movements for Telechron large clocks. Electric Time Company, Inc., 97 West Street, Medfield, MA, USA (508)-359-4396/800-531-2562 FAX 508/359-4482 - <http://www.electrictime.com> - sales@electrictime.com

I have set up a facility to rewind the coils for Kundo and Jungens moving magnet pendulums. If anyone is interested in this, contact me John R. (Jack) Seeley, FNAWCC, at jackclok@bellsouth.net. Suggestions welcome, since I have not decided on a price.

Military specification paper tubes that do a good job of supporting the stack of three "D" cells that power the Poole Desk Clocks. If the batteries in your clock do not fall out every time the clock is moved, you probably do not have a Poole Clock. These tubes are \$2.50 each plus shipping. Please call Bill Ellison at 313 882-9380.

Chapter 78 member Robert Miles has published a very interesting book titled "Synchronome—Masters of Electrical Timekeeping." The book can be ordered online from the Antiquarian Horological Society. For details use the link: www.ahsoc.org/synchronome.
