

# The Journal of the Electrical Horology Society

Chapter #78 National Association of Watch and Clock Collectors

## President's Message

Fellow Horologists:

Let me begin by apologizing for the delay in getting the Journal of the Electrical Society out to you in a timely fashion. Our editor, Tony Bolek and I are working diligently to bring the distribution of the Journal up-to-date.

You may have noticed the announcement in the May/June issue of the NAWCC Bulletin that Mr. Martin Feldman had died. Marty was the founder of what was to become NAWCC Chapter #78. He began gathering potential members interested in electrical horology during the late 1960's and early 1970's.

The first Journal was published on March 17, 1972 (then identified as NEWSLETTER #1) with Marty serving as Acting Chairman and Editor. As the chapter developed, Marty continued as Chairman and Editor for the next 14 years. Through those years, Chapter #78 continued to grow and was eventually granted membership in NAWCC in late 1973. Our sincere condolences go out to Marty's family.

keeping our dues to a minimum. Thank you for your cooperation.

Finally, a meeting of Chapter #78 and those interested in electric clocks will be held at the NAWCC National Convention in Dayton, Our meeting is scheduled for Friday, July 4, 2013 at 4:00. All are welcome and, since this meeting is the last meeting for the day, we can meet, compare, and discuss electric clocks as long as we want. I look forward to seeing you at the Dayton National Convention.

Please have a nice summer and enjoy this issue of the Journal of the Electrical Society.

Bill Ellison, FNAWCC      President

### The Side Bar:

- In this issue, Part II of Herschede Electrically Wound Floor Clocks and Mantel Clocks.
- Also featured is a 1929 Price List for Herschede Electrically Wound Floor and Mantel Clocks.
- Members: "We are always looking for information suitable for the Journal and greatly appreciate the loan of original material."

Mart	24

Changing subjects, beginning in January of this year, we attempted to collect dues on the anniversary of each member's joining Chapter #78. This approach was intended to reduce the activities which occur around the first of the new year. However, we quickly discovered that this approach just created confusion and was not at all popular. Consequently, we will return to the old timing and dues will be collected on the first of January and will cover the calendar year. A dues renewal form for 2013 is included in this issue of the Journal. Dues remain \$10.00 per year. However, if you are behind in your payment, the total amount dues outstanding is shown on the form. Please pay your dues promptly as this helps greatly in

### Herschede Electrically Wound "Grandmother" Chiming Clocks

THE "GRANDMOTHERS" have always been popular members of the Herschede family, and these Electrically Wound Chiming models are no exception. They are about the same size as the Petite models, and are used in the same settings, being particularly adapted to the living room, hall, library or stair landing of the small home. Their very moderate price, which is due to the fact that the movement chimes on "Symphony" chimetone rods instead of the tubular bells, makes them good sellers.

These Grandmother Clocks are fitted with two chime movement only—Westminster and Canterbury. Cases are of finest Honduras mahogany, medium brown finish, hand rubbed.

**No. 460**

# HERSCHEDE CHIMES

## THE WESTMINSTER CHIMES

*"Lord, through this hour,  
"Be Thou our guide  
"So, by Thy power,  
"No foot shall slide."*

PERHAPS the most universally loved chimes are those of Westminster. They have been reproduced in many celebrated towers.

It is generally accepted that this carillon was composed by Dr. Randall,

Regius Professor of Music, and that he conceived the idea from the fifth bar of the opening of Handel's Symphony: "I know that my Redeemer liveth." However, there are others who believe this carillon was composed by a Mr. Crotch, pupil of Dr. Randall. Westminster Chimes were first fitted into the tower clock at the University Church, St. Mary's the Great, in Cambridge, and were long celebrated for their simple harmony. They were later reproduced on a large scale in the Victoria Tower Clock of the House of Parliament.

# Herschede Electrically Wound Floor Clocks & Mantel Clocks - Part I (continued)

## THE CANTERBURY CHIMES

*"I can pass this way but once,  
 "Any good, therefore, that I can do, let  
 me know it now,  
 "Let me not neglect it or defer it,  
 "For I shall not pass this way again."*

1st Quarter. 2d Quarter.

I'll pass this way but once, Any good that I can do, Let me know it now

3d Quarter.

Let me not neg-lect it, Let me not de-fer it, For I'll not pass a-gain;

4th Quarter. Hour.

I'll pass this way but once, Any good that I can do, Let me know it now, For I'll not pass a-gain.

Copyright, MCMXIV, by The Herschede Hall Clock Co.

MANY years ago one of the Herschede craftsmen was visiting in England. He spent considerable time in the famous Canterbury

Cathedral. He came away inspired. He would compose a new chime to express his admiration for that noble structure. The result was the lovely Canterbury Chimes.

## THE WHITTINGTON CHIMES

*"Turn again, Whittington,  
 "Lord Mayor of Londontown."*

1st Quarter. 2d Quarter.

3d Quarter.

4th Quarter. Hour.

DICK WHITTINGTON, so tradition has it, was a boy escaping the drudgery imposed by his master's housekeeper. Resting at the first milestone, he seemed to hear these distant chimes say to him: "Turn again, Whittington, Lord Mayor of Londontown."

The chimes became famous, through

this beautiful legend connecting them with the boy, Dick Whittington. The correct Whittington chime is played on eight bells and is reproduced above. It was first rung in the Church of St. Maryle Bow, in the 14th Century.

## Herschede Electrically Wound Floor Clocks & Mantel Clocks - Part II (continued)

ELECTRIC TIME AND

CATHEDRAL CHIME

### CHIMES

**H**ERSCHEDE Mantel Chime movements are furnished with chime rods of elegant tone made of special, patented triple-process silver metal and mounted so as to insure lasting resonance. Tubular chimes furnished in the floor clocks are also made of triple-process bell metal, seamless, drawn with great care. They are highly polished nickel and have a rich deep tone and are superior in tone quality to any other make on the market. Both mantel and floor chimes are tuned in sets by a well-known Cincinnati Professor of Harmony to absolutely true pitch and are delightful because of their harmonious, sweet, resonant tone.

Chime rack springs are fitted with patented spring tension adjusters by which the blow of the hammer on the tube can very easily and accurately be adjusted, insuring proper volume for the chimes.

Any of the above listed mantel clocks can be fitted with hand wound movement, if desired, at list \$12.00. Retail \$10.00 less than other listed for the electrically wound movement.

## Electric Horology Links

Calling all Members:

If you have a link to an interesting internet site you think other members may enjoy visiting, let us know and we build a list in the Journal. Of course it should be about electric clocks or watches. Sites with information about repair and restoration tips and techniques are also encouraged.

Some useful links:

Glass dome for the large Bulle clock. We also have glass domes for the Tiffany Never Wind, Barr, Poole, and Kundo clocks. If I don't have it in stock, I'll try to get it. Ben Bowen, PO Box 4718 Dowling Park, FL 32064; (386) 658-1167; E-mail me at [www.glassdomes.com](http://www.glassdomes.com).

CD containing over 100 electric clock systems, such as ATO, Brillie, Bulle, Campiche, Eureka, Garnier, Gent, Hipp, Holden, Magneta, Poole, Scott, Shortt, Synchronome, Tiffany, Vaucanson, Wagner, Warren & many more. Price \$30, includes shipping. J. E. Bosschieter; E-mail me at [BoscoClocks@Zonnet.nl](mailto:BoscoClocks@Zonnet.nl).

A Guide to Electrical Horology" by Martin Swetsky, FNAWCC. A step by step book on the repair and servicing of Tiffany Never Wind, Poole & Barr, Bulle, Eureka, Synchronome, Self Winding, American Clock Co. (Chicago), Standard Electric, ATO, Sempire, NoKey, Brille, Pulsynetic, etc. Cost \$42.00 Post Paid. Contact Michell Swetsky, 10 Chelsea Way, Fairport, NY 11450; E-mail me at [www.SwetskyNY.net/agteh](http://www.SwetskyNY.net/agteh) or [MSwetsky@Rochester.rr.com](mailto:MSwetsky@Rochester.rr.com).

Electronic "master clock" for old slave dials: \$50. "Governor" makes Eureka clocks keep quartz-accurate time with no change to the clock: \$95. Voltage regulators: \$35 to \$55. Bryan Mumford, 3933 Antone Road, Santa Barbara, CA 93110; (805) 687-5116; E-Mail [www.bmumford.com](http://www.bmumford.com).

Tower & Street Clocks - Electric Time Company, manufacturers new tower and street clocks. Exact replacement movements for Telechron large clocks. Electric Time Company, Inc., 97 West Street, Medfield, MA, USA (508)-359-4396/800-531-2562 FAX 508/359-4482 - <http://www.electrictime.com> - [sales@electrictime.com](mailto:sales@electrictime.com)

I have set up a facility to rewind the coils for Kundo and Jungens moving magnet pendulums. If anyone is interested in this, contact me John R. (Jack) Seeley, FNAWCC, at [jackclok@bellsouth.net](mailto:jackclok@bellsouth.net). Suggestions welcome, since I have not decided on a price.

Military specification paper tubes that do a good job of supporting the stack of three "D" cells that power the Poole Desk Clocks. If the batteries in your clock do not fall out every time the clock is moved, you probably do not have a Poole Clock. These tubes are \$2.50 each plus shipping. Please call Bill Ellison at 313 882-9380.

Chapter 78 member Robert Miles has published a very interesting book titled "Synchronome—Masters of Electrical Timekeeping." The book can be ordered online from the Antiquarian Horological Society. For details use the link: [www.ahsoc.org/synchronome](http://www.ahsoc.org/synchronome).
